

# **BUSINESS QUESTIONS**

## **Visualization Tool for Electric Vehicle Charge and Range Analysis**

### **Business Questions**

1. Which electric vehicle offers the highest driving range?
2. Which EV brand provides better efficiency?
3. Which electric vehicles are available at affordable prices?
4. Which locations have the highest number of charging stations?
5. How does battery capacity affect driving range?
6. Which vehicle provides the best value for money?
7. How can interactive dashboards help users compare EV models?
8. Which charging stations are suitable for long-distance travel?

### **Expected Business Outcome**

The dashboard helps users compare electric vehicles based on range, efficiency, price, and charging infrastructure. It supports better purchasing decisions through interactive visualizations and data-driven insights.

### **Conclusion**

The business questions guide the development of dashboards and visualizations by focusing on the most important requirements of electric vehicle users. The project answers these questions using SQL and Tableau dashboards.
