

BRAINSTORMING

Visualization Tool for Electric Vehicle Charge and Range Analysis

Objective:

Identify possible features and ideas to develop an interactive dashboard for analyzing electric vehicle charging and range information.

Brainstormed Ideas:

- Compare electric vehicle driving range.
- Display charging station locations.
- Analyze vehicle efficiency.
- Compare electric vehicle prices.
- Brand-wise performance analysis.
- Dashboard filters for quick analysis.
- Interactive maps for charging stations.
- Visual comparison of vehicle specifications.

Selected Ideas:

- EV Range Analysis
- Charging Station Analysis
- Brand Comparison
- EV Efficiency Analysis
- Interactive Tableau Dashboard
- Story-based Data Presentation

Conclusion:

The brainstorming session identified the most important features required for the project. These ideas were selected based on their usefulness, feasibility, and ability to provide meaningful insights to electric vehicle users.
